WHITE PAPER

ABOUT WARREN

Who hasn't dreamed one day of being able to fly off on a whim aboard a private jet, and enjoy luxury services with friends or family for fun, or with colleagues for professional reasons? If many have dreamed of it, few have this opportunity, either for financial reasons, for lack of information, or due to the cumbersome administrative process (quotation, verification of funds at the bank, etc.)

WARREN modernizes and makes accessible the luxury's service. It democratizes the sharing of these top-of-the-range services, through a simple and intuitive mobile app :

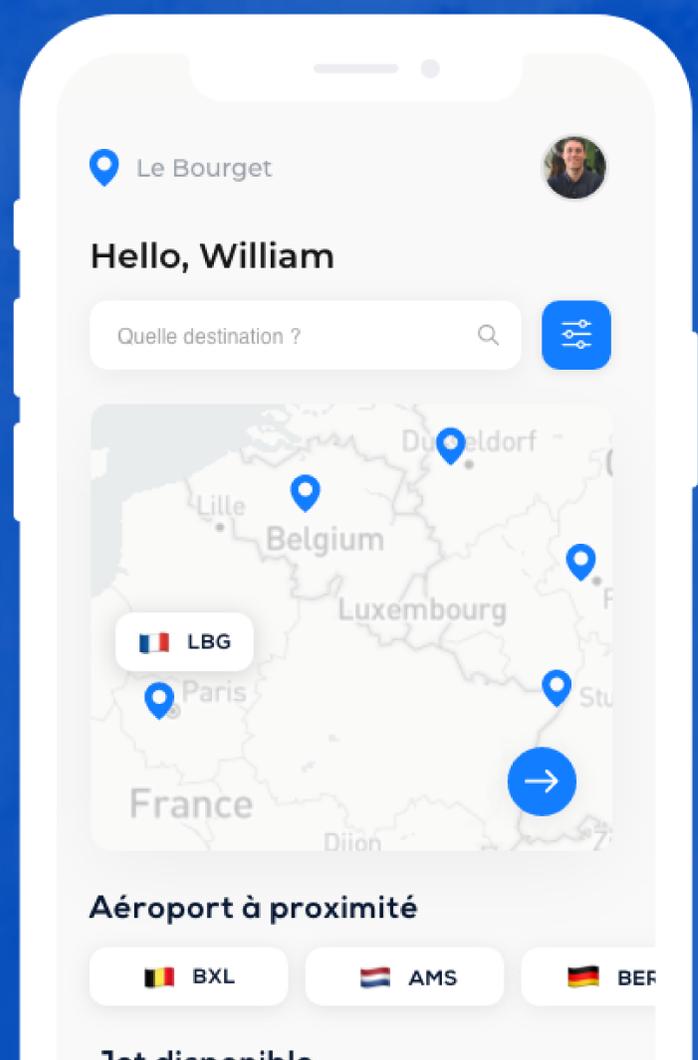

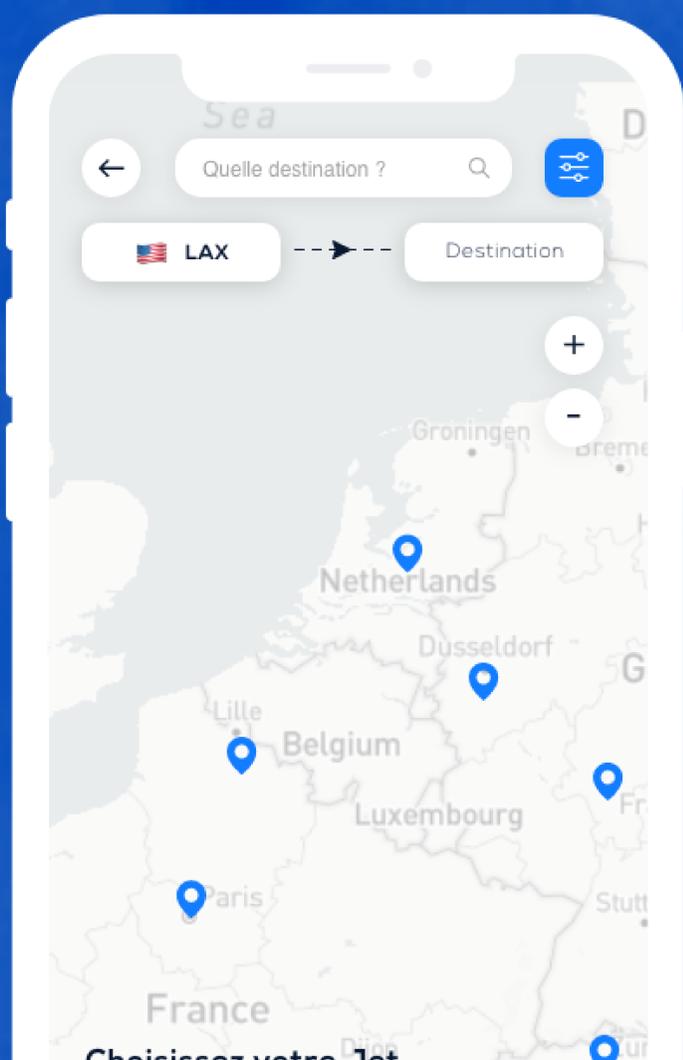

- Private jets
- Supercars
- Yachts
- luxury hotel

With many years of experience in the field of private aviation with its teams, Sabry Pascal Dabou is aware of the difficulties encountered to access to these luxury services.

OUR PURPOSE

We have the ambition to make luxury services accessible thanks to an intuitive and simple mobile app.

We want to be avant-garde, using the latest technologies wisely. We thus rely on the blockchain, in order to provide an impeccable service for end user.

THE MARKET AND ITS WEAKNESSES

Waren's market is the booking of private jets, supercars, yachts and luxury hotels.

Why this market is in full expansion ?

Today, concierge services greatly facilitate access to this market. All it takes is a phone call and a quote to book a private jet flight or yacht trip the next day. The digitalization of these services significantly improves market accessibility.

High net worth individuals have always been enthusiastic of these services. However, due to the health context of recent years and to guarantee the safety of their employees, companies are increasingly using brokers in the private aviation sector for business trips. Similarly, an increasing number of wealthy individuals, accustomed to the first class of commercial flights, are inclined to charter private jets.

We also see new users who have succeeded in the world of entrepreneurship or on social networks and need to optimize their time. They travel regularly, as they have connections all over the world and are interested by these services.

Applications in this area are beginning to emerge. This proves that we are in a buoyant and growing market.

Digitalization simplifies connections with dedicated applications. It is therefore logical to democratize access to luxury services in order to meet a new emerging demand.

The weaknesses of these services

Today, the market for luxury services, and in particular for private aviation, is facing several problems.

However, the first one Waren wants to address, thanks to its application, is the lack of transparency, and the lack of a dedicated platform. Indeed, there is currently no platform to book a private jet flight. This involves contacting concierge services and these services reveal several disadvantages.

The first consists of limited flexibility and lack of responsiveness due to the non-automation of the service. This is crucial because the customer requires a high level of flexibility when using a concierge service.

The second relates to the response time when booking and the quote's writing. They sometimes require long times because they are tedious steps for the provider.

The third concerns the significant cost associated with the limited number of users of the services, making the amortization per customer relatively high.

The final drawback relates to the limited accessibility of these services, which until now have always been reserved for wealthy individuals.

waren

PRESENTATION OF THE PROJECT IN DETAIL

Waren corresponds to a functional service, for several years now, and recognized in the world of private aviation.

We want to go further. We are convinced that luxury services can be improved and in a certain sense this also means making these services more accessible. Our real economy project aims to mobilize the technology gateway to make your user experience as simple as possible.

Presentation of our services

What is Waren? Waren is the solution that makes your life easier. It is an application that opens access to luxury services hitherto accessible only to a certain elite. With Waren, it is now possible to benefit from these services in a few clicks, at affordable prices, especially thanks to the sharing of services.

Private aviation has been our core business for more than 7 years now. Over the years we have developed a network that allows us to see further today. Indeed, if Waren refers to a tailor-made application for private aviation, we are currently developing the Waren service in order to meet users' expectations in terms of various and varied tailor-made services.

Waren Plus: allows you to take advantage of the Waren team network for tailor-made services and unforgettable experiences: supercars, yachts, luxury hotels

The reasons to use Warren

Luxury services, quality services, our teams have more than 7 years of experience in the field and have a network that offers tailor-made qualitative services.

Our goal is to make these « elitist » services accessible to everyone. How? Waren is the app that has been missing until now to make quotes and reservations for private flights.

Finally, it is possible to book shared flights, offering the user the possibility of flying by private jet, as well as by commercial jet depending on availability.

Our experience has allowed us to understand that in this market, 4 factors are crucial:

Time
Flexibility
Price
Accessibility

And of course, all of this has to be based on an app that's really easy to use. We therefore sought to create the simplest and most intuitive application possible and that meets the expectations of users.

EXPERT'S ADVICE
24H/24H

REAL-TIME PRICE
ESTIMATION

BOOKING
24H/24H

PRICE

Prices that defy the competition. Waren makes available its years of experience, its expertise, its network to make you benefit from prices related to reality. From now on, it is possible to travel from Paris to Cannes by private jet from 3000 €.

TIME

We are aware that the variable of time is essential. So, if we can't extend your day, Waren can save you valuable time. So you will appreciate our very simple and fast booking system. You will love it even more, when you will just have to arrive at the airport only 30 minutes before take-off.

FLEXIBILITY

If time is a decisive factor, flexibility is no less important. Our users want to be able to book without necessarily planning ahead. Thanks to our application, you can make your quote request and have a return instantly.

ACCESSIBILITY

In order to make these services accessible to as many people as possible, we offer the possibility of booking commercial jets. When someone books their flight, they can specify whether they agree to share their flight with other users. This solution makes it possible to share costs, and also to reduce its carbon footprint.

THE BLOCKCHAIN: THE SOLUTIONS PROVIDED

The blockchain has several advantages:

The use of Blockchain allows data protection, automation, more speed, reduction of intermediaries and transaction fees.

We chose Binance Smart Chain (BSC) for several reasons:

Speed
Use of smart contracts
Mass adoption
Bridge possible
Low transaction fees

The use of blockchain and cryptocurrency payments offer us greater flexibility than our competitors, and aim to better satisfy our customers.

The majority of our competitors require a bank imprint, or receipt of funds by bank transfer before validating a reservation. This type of procedure is very restrictive on weekends and public holidays. As one of the first in this industry to accept cryptocurrency payments, we offer you significant time savings and flexibility. It is now possible to make a reservation within the hour on a whim.

The advantages of « blockchain » by Waren

The creation of our native token:

Although we accept payments in fiat currency, and cryptocurrencies: we have chosen to create our native token within our ecosystem.

The goal is to offer you maximum benefits. We have therefore designed a « smart » program allowing you to benefit from up to 14% discount on each reservation.

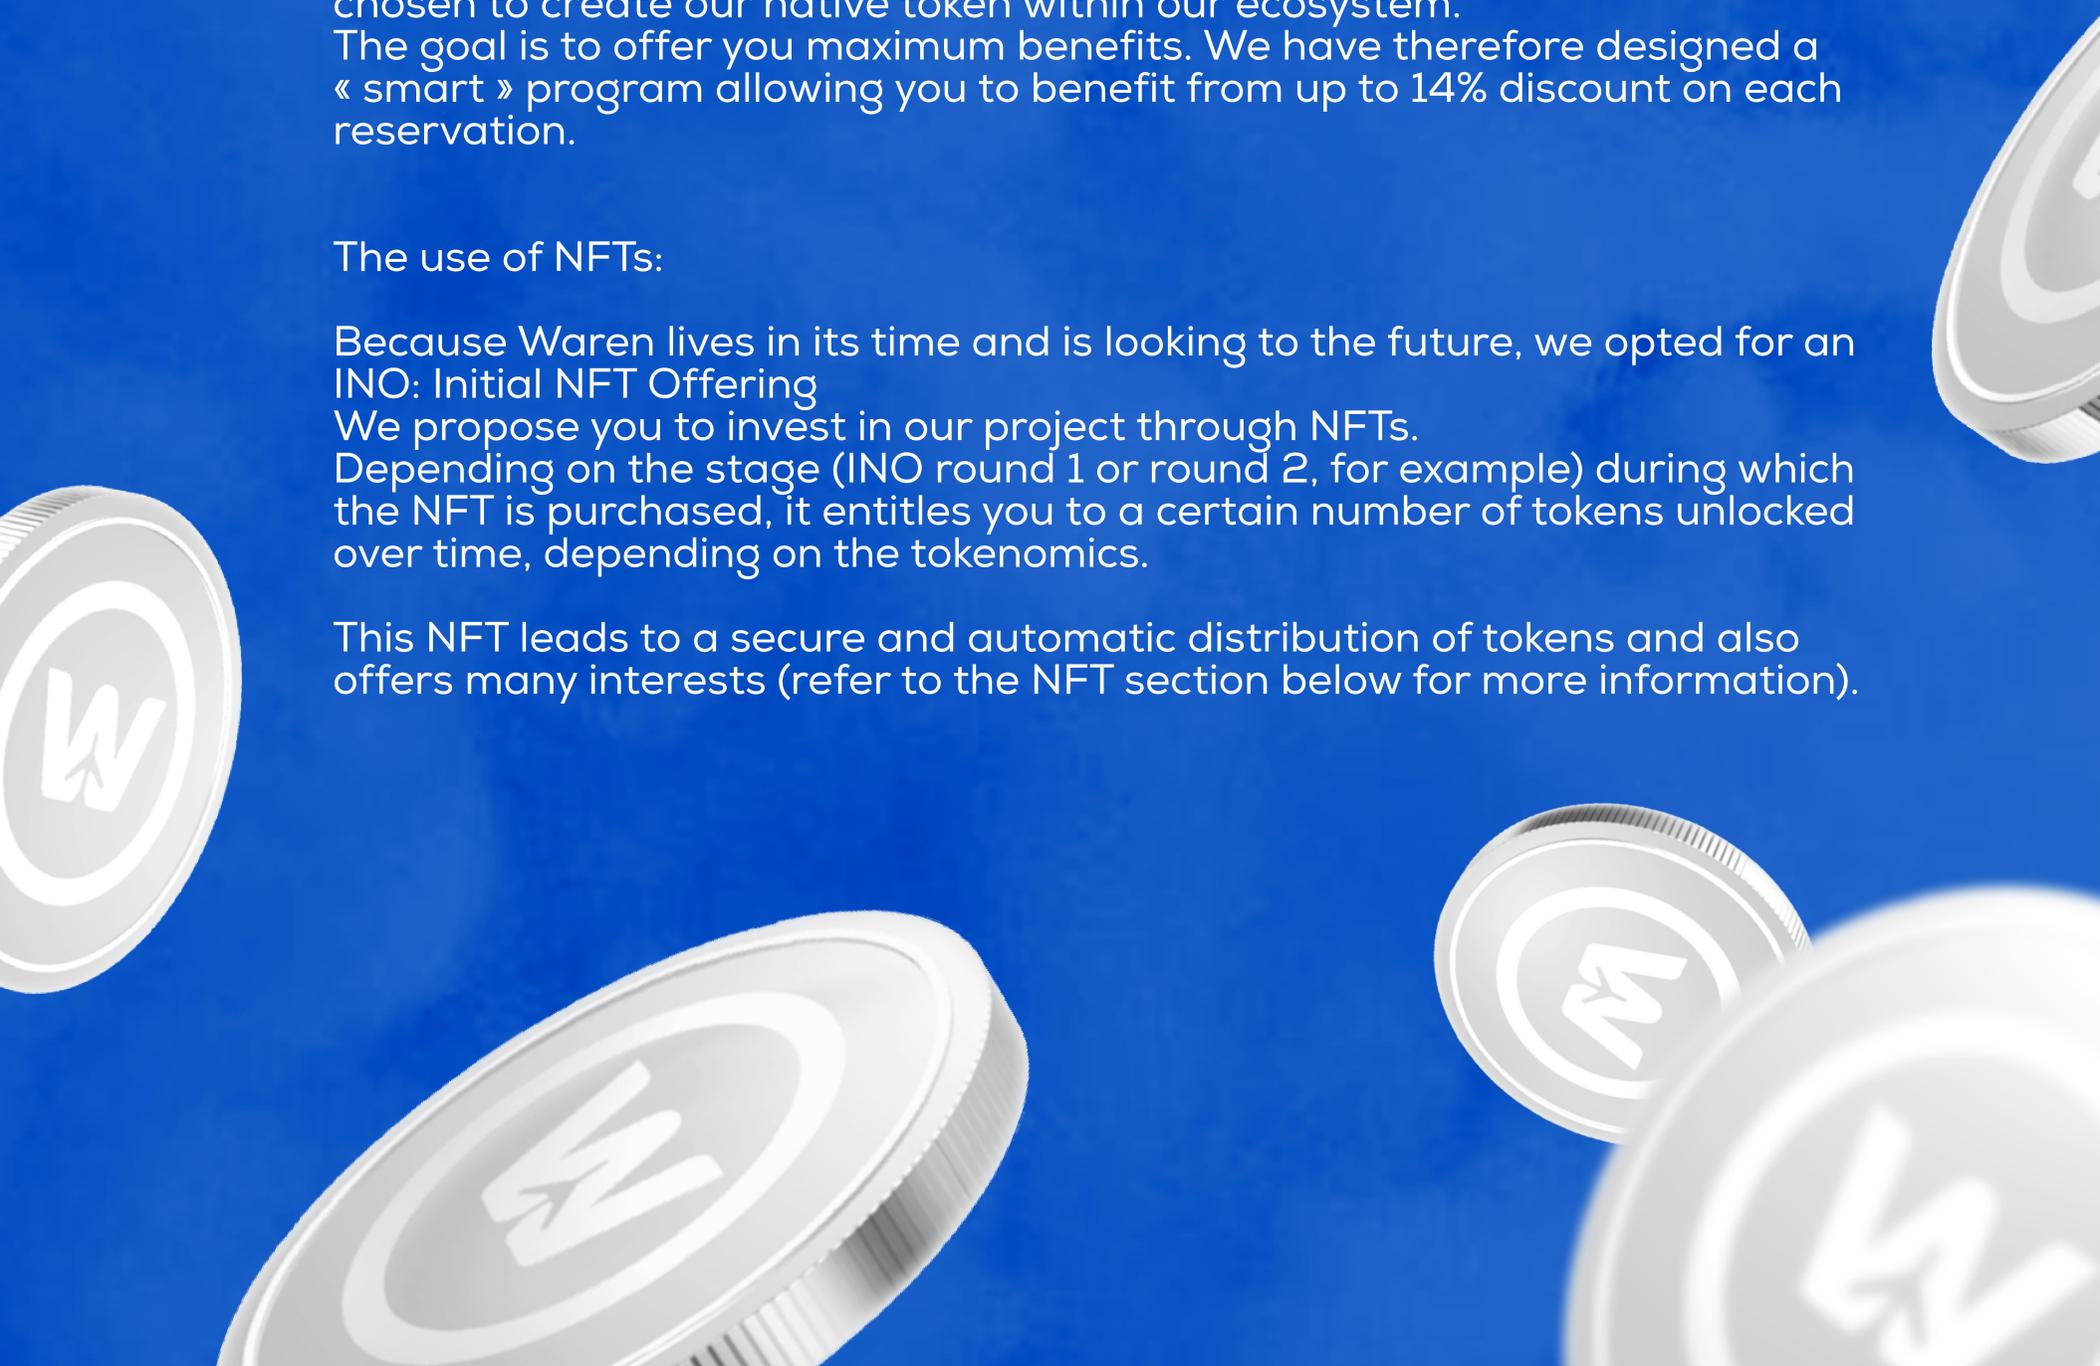

The use of NFTs:

Because Waren lives in its time and is looking to the future, we opted for an INO: Initial NFT Offering

We propose you to invest in our project through NFTs.

Depending on the stage (INO round 1 or round 2, for example) during which the NFT is purchased, it entitles you to a certain number of tokens unlocked over time, depending on the tokenomics.

This NFT leads to a secure and automatic distribution of tokens and also offers many interests (refer to the NFT section below for more information).

TOKEN WRN

A native token within the Waren ecosystem

The WRN token is designed for you. Using it gives you real benefits.

We have set up a program with different tiers based on the means of payment (if you pay using WRN tokens) as well as the WRNs staked. This program is broken down as follows:

Program Level	BASIC	BRONZE	SILVER	GOLD	PLATINIUM	DIAMOND
Amount WRN locked	0 - 1K	10K	30K	50K	75K	150K
Reduction	0%	1%	2%	3%	4%	5%
Fidelity rewards	0%	0%	1%	2%	3%	4%
Cashback WRN token	1%	1%	2%	3%	4%	5%
Program NFT	Yes	Yes	Yes	Yes	Yes	Yes
Voting right	No	No	Yes	Yes	Yes	Yes

REDUCTION

You get up to 5% off depending on the number of WRNs held, and on purchases made on the Waren app. The discount applies directly to the prices displayed on the app.

FIDELITY

A reward of up to 4% of your bookings made with Waren is awarded to you based on the number of WRNs held. This reward is paid in WRN on your wallet after each purchase.

CASHBACK

You earn up to 5% cashback for every purchase made on Waren, for a payment made with the WRN token. The cashback is paid in WRN token on the user's wallet.

BURN AND DEFLATIONARY MODEL

We have opted for a deflationary model because we want to reward the confidence of investors and users. For this, we opt for a limited number of NFTs and therefore WRN tokens (see tokenomics section). In addition, with each transaction, a burn of 1% WRN applies automatically.

AUTOMATIC BURN BASED ON FUNDRAISING

In order to keep a fair and balanced economic model, the share of WRN tokens not raised during our INO will be burned.

NFT WAREN

The different NFTs and their advantages

NFT for INO: as mentioned above, we invite you to participate in our project through an INO (Initial NFT Offering).

What does this mean in practice? If you want to participate in the project, simply purchase one or more NFTs. These NFTs, depending on the stage at which they are purchased (Pre-Sale, Whitelist, Round 1 or Round 2), deliver you benefits. They are the key to recover your WRN tokens released over time according to tokenomics (see tokenomics section).

Affiliation App Waren

A person buying an NFT Pre-sale (at a price of €10,000) therefore receives 40,000 WRN tokens, with a cost price of €0.25 per token. In addition, for any affiliate, it benefits from 5% of the amount of WRN used for purchases on the Waren application (when payments in WRN token will be set up on the Waren App).

Affiliation INO

During the INO an investor receives up to 5% of the investment made by his affiliates depending on the stage at which he invests.

NFT	Amount of NFT issued	NFT Price €	Price WRN token €	WRN token received by NFT	Affiliation	Vesting
NFT pre-sale	125	10K €	0,25 €	40K	5%	6 Month
NFT whitelist	200	300 €	0,40 €	750	1%	6 Month
NFT INO round 1	5250	2K €	0,35 €	5714	2%	6 Month
NFT INO round 2	86666	300 €	0,40 €	750	1%	6 Month

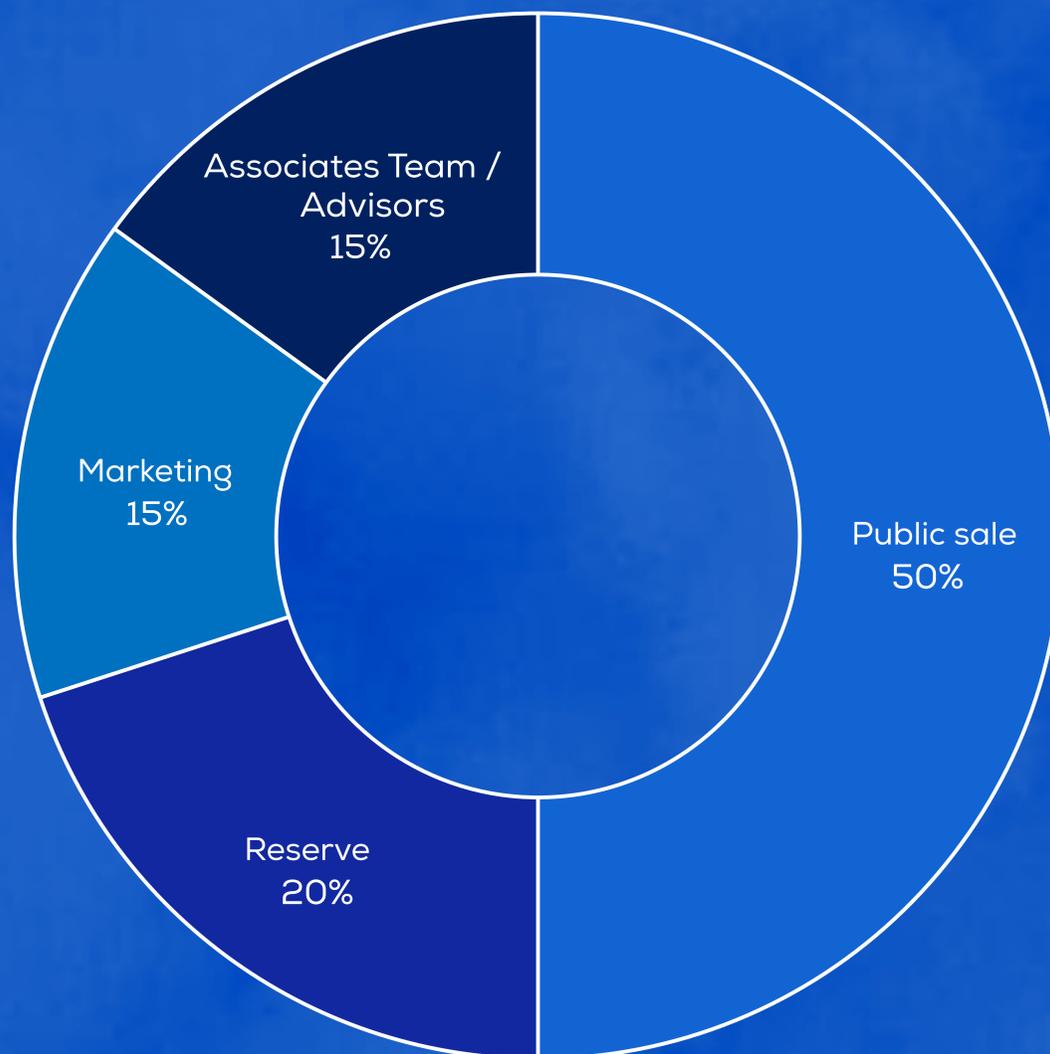

Our NFTs, after a period of 6 months, are therefore exchangeable on marketplaces on the BSC at first. Then, we will create a bridge to the Ethereum/Polygon BlockChain to allow exchanges on a larger number of platforms.

WARNING: The NFT is the key to recovering your WRN tokens. If the NFT is sold it will not be possible to recover the unreleased tokens (see tokenomics).

Similarly, the sale of the NFT results in the sale of affiliate rights on the Waren App.

TOKENOMICS

Token Distribution

	% 200 480 000 WRN	Token Quantity	Price WRN token €	Vesting
Private sale	2,49%	5M	0,25 €	10% listing + 1 month, then 15% by month after 6 months
Whitelist	0,12%	240K	0,40 €	10% listing + 1 month, then 15% par month
INO Round 1	14,96%	30M	0,35 €	15% Listing + 3 months, then 15% par month
INO Round 2	32,42%	65M	0,40 €	15% Listing + 45 days, then 15% by month
Associate Team	15%	30,072M		15% listing + 9 months, then 15% by month
Marketing	15%	30,072M		100% listing
Reserve	20%	40,096M		100% Listing + 15 months

Listings on DEX and CEX will be announced later.

Token price at listing: €0.50
